CleanShield

Cut-Resistance Gloves

CR600

This product is an ultra-lightweight, uncoated cut-resistant glove that delivers ANSI Cut Level A6 protection without compromising comfort or dexterity. Its breathable construction allows for all-day wear while helping reduce hand fatigue in demanding work environments. Designed to provide reliable protection against cuts and lacerations from sharp tools, blades, and processing equipment, the product helps improve worker safety while maintaining productivity and handling precision. Made with FDA-compliant materials for direct food contact, the product is an excellent choice for food processing applications. Its low-profile, uncoated design also makes it ideal for use as a liner glove beneath disposable nitrile, vinyl, or polyethylene gloves when additional cut protection is required.

Technical Specifications

	Color	Material	Surfacic Mass	Gauges
Palm	black & white	HPPE (High Performance Polyethylene)	300 g/m2	13 Gauges/Inch
