# Cut-Resistance Arm Protection

**CRS16**

The sleeve provides focused forearm protection for work involving sharp edges and abrasive materials. Its flexible knitted construction moves comfortably with the wearer and allows airflow during active tasks, while secure ends help keep coverage in place. It is a practical addition to hand protection programs where reliable cut protection and mobility must work together.

## Application

- Steel Processing
- Metal Handling
- Food Processing

## Technical Specification

| | |
|---|---|
| • Cuff Colour: | White |
| • Product: | 13G Cut Resistant Arm Protection, Level D |
| • Origin: | Made in China |
| • Material: | HPPE / Polyester / Glass Fiber / Spandex |
| • Size: | 40 cm |
| • Abrasion Resistance: | 4 |
| • Tear Strength Resistance: | 4 |
| • Puncture Resistance: | 3 |

## Features

- Unique knit structure allows breathing
- Blousy fit provides superior comfort and breathability
- Elastic on both ends keeps sleeve securely in place
- Available in several lengths
- Available with or without thumb hole

## Packaging

**12 PAIRS / PAIRES x 10 BAGS / SACS = 120 PAIRS / CASE / PAIRES / CAS**

## Compliance

- EN 388:2016: 4X43D
