CleanShield

N95 Particulate Respirator with Exhalation Valve CS44151

CleanShield N95 Particulate Respirator with Exhalation Valve is designed to help protect against certain non-oil based airborne particulate aerosols. The molded respirator includes a low-resistance exhalation valve to reduce heat build-up and improve breathing comfort in hot or humid working environments.

Technical Specifications

• Colour:	White
• Type:	N95 Particulate Respirator
• Filter Efficiency:	At least 95% against non-oil airborne particulates
• Exhalation Valve:	Yes
• Nose Piece:	Pre-shaped / adjustable nose area
• Strap:	Headband style
• Country of Origin:	China

Features

- Low-resistance exhalation valve
- Helps reduce hot air build-up
- Lightweight structure for easy breathing
- Ergonomic mask shape for comfortable fit
- Soft nose foam for improved facial seal
- Welded elastic strap
- No metal used
- Latex-free material
- Maintenance-free disposable respirator

Packaging

10 PIECE / PIÈCE x 20 BOXS / BOÎTES = 200 PIECE/CASE / PIÈCE / CAS

Compliance

- NIOSH N95 Approved
- 42 CFR Part 84
- TC-84A-7720
- ISO 9001:2015 manufacturer quality management system
