Thermal Insulated Box Liners

IBL231827

The insulated box liner helps protect temperature-sensitive goods during packing, storage, and delivery. Its reflective, cushioned construction slows temperature transfer while adding a barrier against moisture and minor handling impacts. Lightweight and easy to place inside cartons, it supports efficient cold-chain preparation without the bulk of a rigid reusable container.

Applications

- Fruits and vegetables
- Cold drinks
- Takeout and delivery
- Grocery packing
- Meal kits / Seafood
- Temperature-sensitive product packing
- General insulated box lining

Technical Specifications

• Material:	VMPET / CPE / Bubble Wrap
• Structure:	Reflective outer film with inner bubble layer
• Size:	L23" x W18" x H27"
• Metric Size:	approx. L58.4 cm x W45.7 cm x H68.6 cm
• Bubble Diameter:	10 mm ± 1 mm
• Bubble Height:	4 mm ± 1 mm
• Dimensional Tolerance:	±15 mm
• Side Sealing:	10–15 mm
• Opening:	Flat open type with tape on one opening side
• Country of Origin:	China

Features

- Lightweight & Easy packing
- Space-saving
- Freshness protection
- Temperature control
- Leak resistant
- Waterproof and moisture resistant
- Reduce heat transfer
- Inner bubble layer provides cushioning and insulation
- Suitable for cold and warm item handling

Packing

20 each / case
chaque / cas

Compliance

- RoHS Directive 2011/65/EU with amendment (EU) 2015/863
