CleanShield

MicroCover2000 Coveralls. White. Individual packed

MPC2000

The Coverall provides lightweight, breathable protection against non-hazardous particles, aerosols, and light liquid splashes. The liquid-resistant microporous film is laminated to a fabric-like polypropylene layer, creating an effective barrier while helping maintain comfort during extended wear. Elasticized wrists, ankles, and hood help reduce the entry of dust, dirt, and airborne contaminants, providing enhanced coverage in demanding work environments. Well suited for food processing, manufacturing, automotive refinishing, waste cleanup, remediation, and general maintenance applications, the product offers dependable full-body protection without compromising mobility or comfort.

Application

- Food Processing
- Manufacturing
- Agriculture
- Janitorial Services
- Protection from non-hazardous dust, aerosols and light liquid splash
