Food Grade Pail with Galvanized Steel Handle PSP20

The food-grade pail provides sturdy storage and transport for ingredients, liquids, powders, and workplace materials. Its galvanized steel handle supports confident carrying, while the durable body is suited to repeated use in busy processing environments. Compatible lid options and multiple colours help facilities organize contents, departments, or workflows more clearly.

Applications

- Food ingredients storage
- Food processing and packaging
- Chemical and industrial materials
- Liquids and powders storage
