CleanShield

Anti-Fatigue PVC Foam Mat

PVCF2030

The anti-fatigue mat provides cushioned support for employees who spend long periods standing at fixed workstations. Its resilient foam helps reduce pressure on legs and feet, while the textured surface and visible edges support safer movement around the station. The compact format fits naturally into packing, inspection, assembly, and maintenance areas.

Technical Specifications

Color:	Black with Yellow Borders
Materials:	PVC foam
Surface Pattern:	Diamond Tread
Edge Design:	Beveled yellow safety edges (all sides)
weight per unit area:	3800g/m2
thickness:	16mm
Length x Width:	2'x3'
Slip Resistance:	Diamond-textured surface
Country of Origin:	China

Packing

5 EACH/CASE
PIÈCE/CAS

Applications

- Industrial workstations
- Assembly lines
- Packing & inspection areas
- Workshops & maintenance zones
- Light industrial use

Features

- Diamond-patterned embossed surface offers excellent traction.
- PVC backing is flexible, crush-resistant, anti-fatigue, help enhancing work efficiency
- Beveled edges resist mat down, for safety and easy cart access.
- High visibility yellow borders
- Easy to clean & maintain
- Anti-fatigue cushioning reduces leg & back strain

Compliance

- ISO9001
- BSCI
