To Our Customers:

21 JAN, 2025

Traceability Program

YUK Corporation Traceability Program is in order to tracking and recall the defective products that may not meet the requirements or regulations of the Canadian Food and Drugs Act.

The following programs are relevant for CleanShield products tracing

- Shipment of CleanShield products have unique lot numbers.
- Lot numbers must appear on the cases, boxes, bags and labels
- Each unique lot number must establish a file includes all involved transactions records: PO, Invoice, Production, Packaging, Transportation, Storage
- Each unique lot number must establish a file includes manufacture suppliers' lot numbers of raw materials, additives, pigments, packaging materials and all substances that involved with CleanShield products and packaging.
- Manufacture suppliers must have traceability through procurement records. According to the material identifications and batch numbers, the materials used in the production process can be traced back to the material suppliers
- Manufacture suppliers must check the quality for the product during the processing time, strictly traceability through the inspection sheets and production records.
- The Technical Production Department strict performance the quality of the product standard to check all the products before shipping out.
